1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 2, line 2, changed "peak" to --said peak--.

In claim 16, line 1, changed "claim 9" to --claim 12--.

2. The following is an examiner's statement of reasons for allowance: prior art of record fails to show or fairly suggest a hinge assembly having the combination as claimed including a link control member connected to the channel, a single link member with a contact surface having a peak separating an operative portion and a break-away portion such that the channel is movable from a fully open position to a farther break-away position. Prior art references, for example Cummins et al. (6,453,510) and Pelletier et al. (6,397,836), show a hook formed at one end of the single link to prevent the channel from moving beyond the open position. Prior art to Zanetti (5,291,634) shows a lever having a peak constantly in contact with a wheel in the over, defining a position beyond the fully open position. However, modifying the prior art references to meet the invention as claimed requires a mass alteration and therefore renders the motivation hindsight.
